OBJECTIVE

Detail-oriented Junior Penetration Tester with hands-on experience in vulnerability assessment, exploitation, and privilege escalation across 50+ CTF challenges and lab environments. Ranked in the top 8% on TryHackMe. Proficient in the full penetration testing workflow from reconnaissance to reporting, leveraging tools including Burp Suite, Metasploit and Nmap. Eager to contribute to a professional security team and grow toward a full-time red team role.

EDUCATION

Bachelor of Engineering – Computers and Automatic Control

2022 – 2027

Faculty of Engineering, Tag University

Tanta, Egypt

- Relevant Coursework: Network Security, Computer Networks, Software Engineering, Database, Software Testing, Introduction to AI

PROFESSIONAL EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) — Ministry of Communications & IT (MCIT)

Technical Trainee – Vulnerability Analyst & Penetration Testing

July 2026 – Present

- Selected for a competitive, government-backed scholarship focused on advanced offensive security methodologies and vulnerability management
- Building hands-on proficiency in network scanning, web application security testing, and system exploitation techniques
- Completing professional development modules covering freelancing strategies, career planning, and workplace communication
- Working on security challenges and practical scenarios to strengthen penetration testing and problem-solving skills.

Commercial International Bank (CIB)

Summer Intern – Banking Technology & Operations

July 2026

- Completed an intensive virtual banking internship covering modern financial ecosystems, digital transformation, and banking risk management
- Analyzed the integration of AI, Machine Learning, and Data Analytics in optimizing financial services and reinforcing cybersecurity protocols

TECHNICAL SKILLS

Penetration Testing: Vulnerability assessment, exploitation, privilege escalation, reconnaissance, information gathering, web application testing, network penetration testing

Attack Techniques: SQL injection, XSS, directory traversal, brute force, hash cracking, password attacks, enumeration, lateral movement

Tools: Nmap, Burp Suite, Wireshark, GoBuster, Hydra, Metasploit Framework, John the Ripper, Netcat

Cryptography: Hashing (MD5, SHA1/256/512, SHA3, BLAKE2b), Caesar cipher, dictionary attacks

Operating Systems: Kali Linux, Windows 11

Scripting: Python (in progress)

Soft Skills: Analytical thinking, problem solving, team collaboration, attention to detail, fast learner

VOLUNTEERING EXPERIENCE

Youth Leader & Volunteer | Church – Gharbia

Jan 2023 – Present

- Designed and delivered structured weekly sessions to 20+ children over 3 years
- Presented 30+ educational talks to youth groups, building strong public speaking and communication skills

PROJECTS

CipherToolkit | Python

05/2026

- Engineered a command-line cryptography toolkit supporting 7 hashing algorithms (MD5, SHA1, SHA256, SHA512, SHA3-256, SHA3-512, BLAKE2b)
- Built a hash-cracking module using wordlist/dictionary attacks, successfully cracking test hashes against a 10,000+ word dictionary

Automated Recon and Exploitation Tool | Python

2026

- Built a modular pipeline integrating 12+ open-source tools (Subfinder, Httpx, Katana, Nuclei, Sqlmap, Dalfox) from subdomain enumeration to vulnerability scanning
- Designed an AI agent (LLaMA 3.3 70B via Groq API, Playwright) that discovers endpoints, tests forms with security payloads, and flags SQLi, XSS, IDOR and login bypass
- Generated automated HTML vulnerability reports; validated only on legally sanctioned test applications
